- A similar Uranus/Neptune/Pluto double sextile trine happened in 476 CE which saw the fall of the Western Roman Empire and the beginning of the Middle Ages in Europe.
- In 476 CE, Aryabhata was born. He was the first great mathematician/astronomer of the classical age of Indian mathematics and astronomy.
- The first Shinto shrines appeared in Japan in 478 CE.

January 29, 476

The previous cycle of Uranus/Neptune/Pluto minor grand trines that lasted for a few years began in January of 476 CE with Saturn conjunct Pluto. Thus, it's not surprising that this cycle was followed for 500 years by the Dark Ages.

The previous cycle of Uranus/Neptune/Pluto minor grand trines that lasted for a few years began in January of 476 CE with Saturn conjunct Pluto. Thus, it's not surprising that this cycle was followed for 500 years by the Dark Ages.
