## CIRCLES - ANSWERS

Find parametric equations for the following circles. Be sure to state the range of values for your parameter.

1. The circle of radius 1 with center at the origin (aka the unit circle). Give three different parametrizations including one that traces the circle in the clockwise direction.

Answers will vary.

| $x=\cos t$ | $x=\cos 2 t$ | $x=\cos t$ |
| :--- | :--- | :--- |
| $y=\sin t$ | $y=\sin 2 t$ | $y=-\sin t$ |
| $0 \leq t \leq 2 \pi$ | $0 \leq t \leq \pi$ | $0 \leq t \leq 2 \pi$ |
|  |  | (clockwise) |

Also,
$x=\cos (-t) \quad x=\cos t$
$y=\sin (-t) \quad y=\sin t$
$0 \leq t \leq 2 \pi \quad 2 \pi \geq t \geq 0$
(clockwise) (clockwise, start at $t=2 \pi$ and end at $t=0$ )
2. The circle of radius 2 with center at the origin.
$x=2 \cos t$
$y=2 \sin t$
$0 \leq t \leq 2 \pi$
3. The circle with center at the origin that contains the point $(1,1)$.
$x=\sqrt{2} \cos t$
$y=\sqrt{2} \sin t$
$0 \leq t \leq 2 \pi$
4. The circle of radius 2 with center at $(1,1)$.

$$
\begin{aligned}
& x=1+2 \cos t \\
& y=1+2 \sin t \\
& 0 \leq t \leq 2 \pi
\end{aligned}
$$

5. The circle of radius $\sqrt{2}$ with center at the origin.

$$
\begin{aligned}
& x=\sqrt{2} \cos t \\
& y=\sqrt{2} \sin t \\
& 0 \leq t \leq 2 \pi
\end{aligned}
$$
