

THE LUNAR MONTH
OCTOBER 2 – NOVEMBER 1

REVIEW OF LAST LUNAR MONTH – SEPTEMBER 2 TO OCTOBER 2

The previous lunar month went pretty much as expected. Sextiles from Neptune to both Uranus and Pluto brought a more transcendent perspective into the planet, and many people are beginning to respond to that. This is seen in the various ways that people are now looking for a way forward from many of the conflicts they are now embroiled in. Also, with Jupiter sextile both transiting Chiron and natal Chiron in the USA chart, the nudge toward joy and transcendence has become part of the Harris/Walz presidential campaign. And with the eclipse Moon occurring in Harris' 10th House, she has gone up in the polls while with the eclipse Moon positioned in Trump's 8th House, he experienced another assassination attempt. On the world stage, transiting Chiron is still on the cusp of Israel's 7th House, and most of the wounding this month has been between Israel and Hezbollah. However, some good news is that Princess Kate finished her chemotherapy just as Jupiter has moved into a sextile relationship with her Ascendant. But with Saturn semisquare Pluto, another labor strike is now on the horizon in America.

OVERVIEW – OCTOBER 2 TO NOVEMBER 1

The month of October will be interesting in many ways. First, the lunar month begins with a solar eclipse. This eclipse contains some good aspects that will help release a lot of tension, but with the Sun and Moon in Libra making a moderate square to Mars in Cancer, there will also probably be some notable instances of violence. A trine during the eclipse of Venus to Saturn and Mars, however, will help smooth things out. Also, one of the dominant aspects of the month will be Jupiter sextile Chiron which will bring forth the sweet, joyous, more transcendent side of that heavenly body. Additionally, on October 11, Pluto will turn direct just as Jupiter sextile Chiron becomes exact. This signals a turn away from authoritarianism and toward the more progressive future of Pluto in Aquarius. Astronomically, a small asteroid is scheduled to orbit the earth from October through November, a comet is expected to become visible in the night sky in mid-October, and a star is expected to go nova sometime this fall. What will happen on earth in connection with these wildcard celestial events, however, is anyone's guess. Nonetheless, I'm expecting some pivotal events to occur.

“When beggars die, there are no comets seen. The heavens themselves blaze forth the death of princes.” -William Shakespeare, *Julius Ceasar*
