

THE SATURN/NEPTUNE CONJUNCTION AND A FEW FINAL THOUGHTS

**MY THOUGHTS FOR THE MUNDANE
ASTROLOGY SPECIAL INTEREST GROUP
(PART 7)**

CHRISTOPHER P. BENTON, PHD

- The Saturn/Neptune conjunction and the Uranus/Neptune/Pluto minor grand trine will change the world as we know it. However, whether this change will happen gradually over the next few centuries or overnight is not something I can say.

- Empires can fall at this time, and America and Russia are both at risk.

- America is at risk for civil war (Neptune in Aries) as well as conflict abroad (Uranus in Gemini) and radical transformation (Pluto conjunct South Node).

- Russia is at risk for severe wounding (Chiron) and shortages (Saturn).

- The next few years will likely be quite tumultuous for both America and Russia.

- In the July 2, 1776, chart for America, the Saturn/Neptune conjunction will take place in the 6th House, potentially affecting workers and health care.

- In the July 4, 1776, chart for America, the Saturn/Neptune conjunction will take place in the 3rd House and closely conjunct the cusp of the 4th House, potentially affecting the people, the homeland, and the flow of information.

- In the natal chart for Trump, the Saturn/Neptune conjunction occurs in the 8th House, potentially relating to either debt, other people's money, transformation, or even death.

- In the chart for Russia, the Saturn/Neptune conjunction is conjunct the Midheaven, potentially indicating a crisis for leadership.

- In the chart for Putin, the Saturn/Neptune conjunction is in the 5th House but close to the cusp of the 6th House, potentially indicating health problems. Also, the 12th House conjunction of Saturn and Neptune in his birth chart suggests the possibility of assassination or self-undoing.

- The Uranus/Neptune/Pluto minor grand trine began in the summer of 2025 with Saturn conjunct Neptune. Hence, the Saturn/Neptune conjunction and the Uranus/Neptune/Pluto minor grand trine are intertwined and will work together to change the world.

- The Uranus/Neptune/Pluto minor grand trine will expand people's minds and bring in new perspectives. Those who have found spirituality deep within will receive a boost from this long lasting configuration.

- Technology and new inventions will increase by leaps and bounds and transform life for every individual.

- We are currently learning how to even have conversations with artificial intelligence and how to use them as personal tutors. Additionally, when robots merge with AI, it'll be a whole new world.

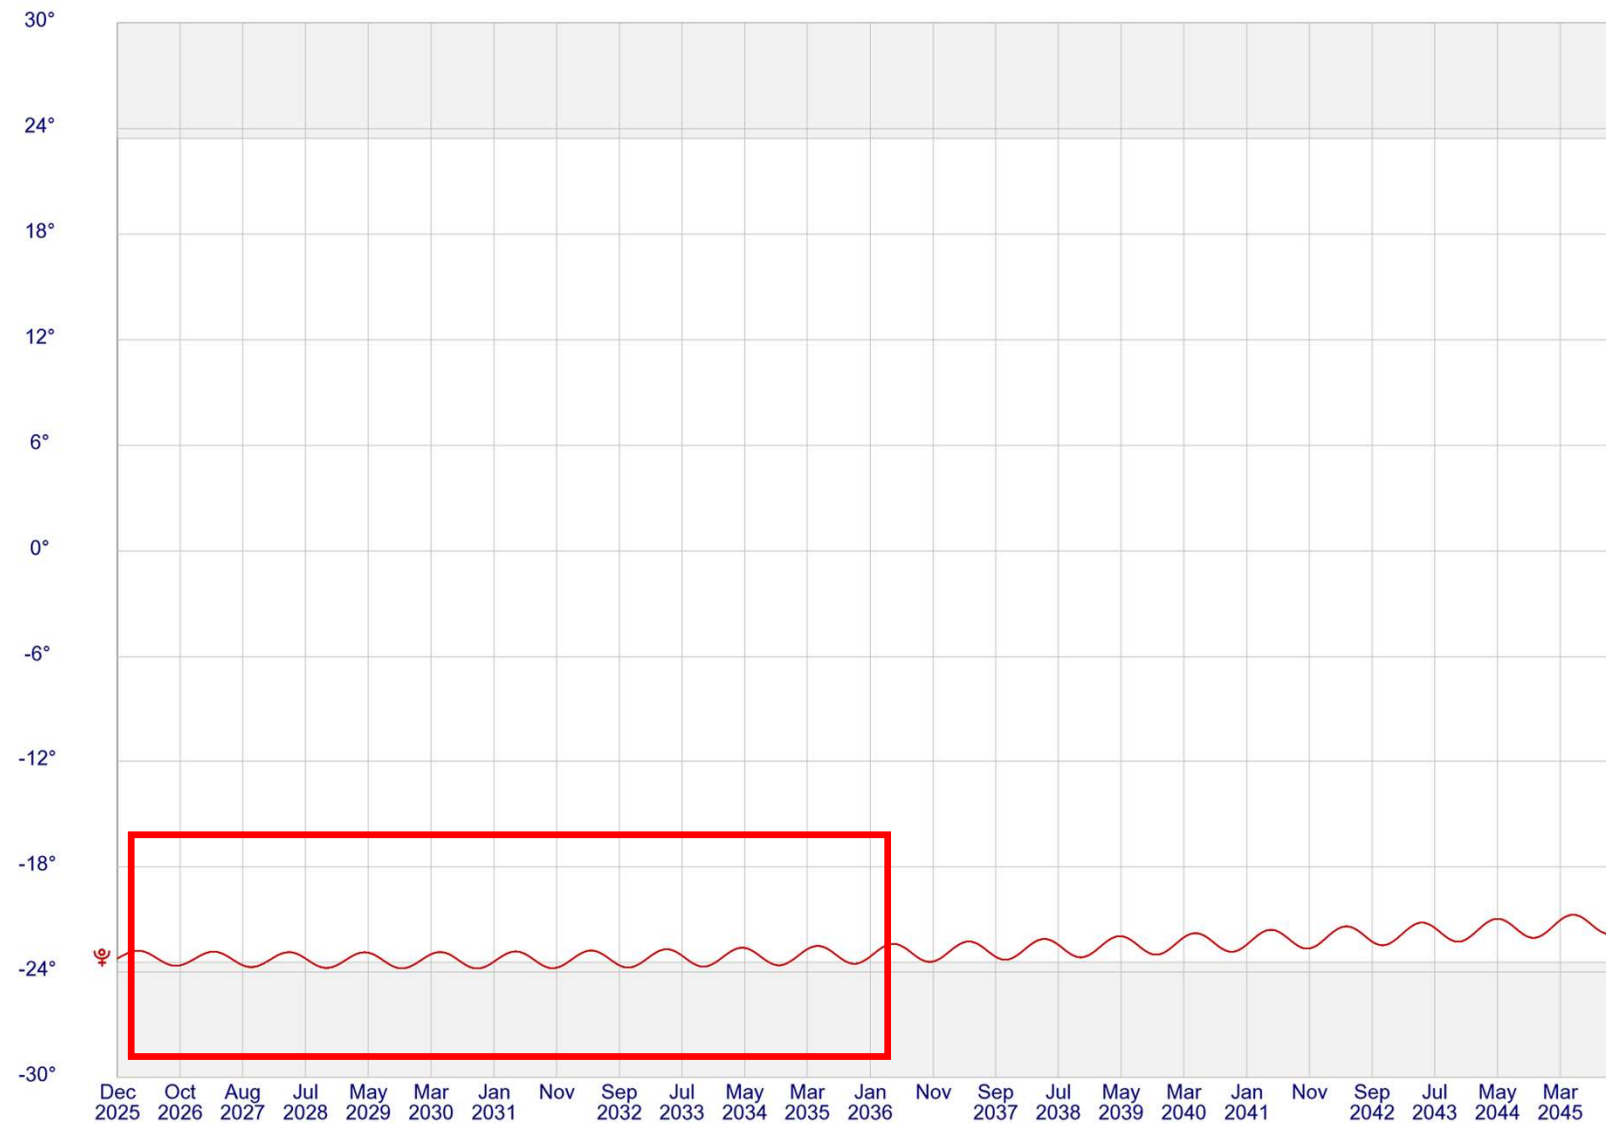

- The most harmonious day of the century may be July 21, 2026, and this day will be the capstone for an entire month of greater harmony.

- The harmony that will exist among the outer planets may even soften the harder transits that will be present for America, Russia, and perhaps other countries.

- The five exact trines between Uranus and Pluto will be a continuation of the three Uranus/Pluto conjunctions that occurred in the second half of the 1960s. Hence, there may be a return to social protests and the best that the sixties had to offer.

- Instead of arguing or complaining on social media, probably the best thing one can do at this time is to meditate and connect in a deep way with the source of oneself, the still small voice deep within, and to act righteously when not meditating. If enough people change themselves, then they will collectively change the world. And it is quite possible that the higher awareness achieved by one may instantly lift up others, too.

Declination, Transit

Also, during much of the 10-year period from 2025-2035, Pluto will spend much of it's time out-of-bounds in the southern latitudes. This is a time when people will tend to rebel.
